

WORLD WIDE RIVER EXPEDITIONS

625 Riversands Rd. / Moab, Utah 84532

435-259-7515 800-231-2769 info@worldwideriver.com

Fisher Towers 3-day/ 2-Night Fisher Towers Adventure Moab

Q. WHERE AND WHEN DO WE MEET WORLD WIDE RIVER EXPEDITIONS?

A. The meeting place for this trip is the World Wide River Expeditions warehouse yard, 625 Riversands Rd at 9:30 AM. **Please check for meeting time updates on the online reservation and do not arrive prior to your scheduled time.** We have other trips that are meeting before yours and we don't want there to be any confusion. If your group arrives in Moab early or has spread out while traveling, please plan to meet at the intersection of Hwy 191 and Hwy 128 just across the river bridge at Lion's Park where there are restrooms and a large parking area to gather, and then proceed to our warehouse at the scheduled time together to make it easier to park your cars in a group. Our warehouse is located at the very end of Riversands Rd. on the left. **Our office is in a residential area so please drive slowly, especially into the parking area.** Once in our warehouse yard, watch for signs and cones that will direct you to park where you will leave your cars until we bring you back to them at the end of the trip. If there are any problems call the local phone number in Moab, **435-259-7515**.

Q. ARE OUR CARS SAFE IN YOUR PARKING AREA?

A. The cars are parked in groups and parallel lines in our warehouse yard. We have never had any problems except for lost keys. We give each group a plastic bag to leave your keys in our office for safe keeping while you are on the trip. We do this to keep your keys safe, but also in case of an emergency and we need to get a car higher up in the line out. A video on how to park is available on your reservation page.

Q. WHAT IS THE TRIP ITENERARY?

A. River time is what we call our flexible itinerary, but this is a basic idea of what each day might look like. Because of fluctuating river flows and weather conditions, it is difficult to give any more detailed itinerary than what we have below:
Day 1: After arriving at our warehouse between 9:30 and 10:00 AM there are restrooms and changing areas to change your clothes and a trailer ready to pack your personal items in to be transported to the first nights' camp. Once all groups have checked in, turned in their paperwork and keys, loaded their gear in our trailer, and everyone has a lifejacket and full water bottle, the busses leave about 10:30 for the hour-long bus ride to the launch site at Dewey Bridge on Highway 128. You will arrive around noon where lunch will be served. Today is a nice, 3-4 hour float with beautiful scenery, swimming, and water fights. You will arrive at camp between 4:00 and 7:00 pm depending on the water level. Dinner is served between 5 and 8 pm. There is time in the evening for an activity that either you plan, or the guides can help with. It is dark around 9:30 pm and campground quiet hours are 10 pm.

Day 2: Breakfast is generally around 7:15 am, but the guides will let you know the exact time the night before. It is up to each group to get their members up and moving to breakfast on time. It gets light around 6 am so it is hard to sleep in. You will be on the river about 8:30 am. On this itinerary the personal gear is loaded back into our trailer by the group before leaving for the day. Today is rapid day with fun and splashy rapids. Lunch will be served around noon at the river's edge. You will arrive in camp between 4:00pm and 6:00 pm where the trailer with your camping gear will be to unload by the group. Dinner is served sometime between 5 and 8 pm. This evening is a great opportunity for your group to have a devotional, play games, or just enjoy the evening.

Day 3: Breakfast will be about 7:15 am. After the gear is loaded into the trailer one last time the group will launch around 8:30 AM. Today is a last chance for a nice float to get in last minute swimming and water fighting before taking out between 11:00 AM and 12:00 PM depending on the water level. It is a 5 min drive back to our warehouse where you will load your gear into your vehicles, change if you want, and have lunch before getting on your way by 1pm.

Q. DO YOU GIVE US ANY KIND OF ORIENTATION BEFORE WE GET ON THE RIVER?

A. There will be an orientation at the launch area before **ANYONE** gets into the rafts. It is a vital part of your trip and we stress that **EVERYONE**, including leaders, pay strict attention. There is also an orientation video on your trip confirmation if you would like your group to have an idea of what they will be told before they arrive.

Q. WHAT LEVEL OF WHITEWATER ARE WE GOING ON?

A. The Fisher Towers section of the Colorado River is fun and splashy Class I-II whitewater (on the Class I-VI scale). The first day is a calm water float that brings you into view of the beautiful Fisher Towers before camping. The second day is a float down the Moab Daily section that has 5-7 sets of fun, splashy, whitewater. The third day is another calm water day where your group can get your last splashing and swimming in before taking out. The water levels are generally higher early in the summer and provide a more intense whitewater experience, but the water is colder. Later in the summer the water levels mellow and the water is warmer in the river which might be a better experience for those who like to swim in the river.

Q. HOW MANY MILES WILL WE ACTUALLY BE COVERING ON THE RIVER?

A. Maximum length is 30 miles from Dewey Bridge to Moab on the Fisher Towers section of the Colorado River along Highway 128. Water conditions may alter the points of entry and take out each day.

Q. HOW WARM IS THE WATER AND CAN WE SWIM?

A. The water temperature in June is around 50-60 degrees. In July and August, the water can be 65-80 degrees. Swimming can be done on most of this section of the river. Due to the unpredictable depth of the Colorado River, there are sections where your guide will tell you that swimming is not allowed. Please ask your guide if it is safe to swim. **When exiting the raft into the water always go feet first.**

Q. WHAT DO WE DO IF ONE OF OUR GROUP NEEDS FIRST AID?

A. Our guides are all trained in Advanced Wilderness First Aid and CPR and will have a first aid kit with them. If someone needs more urgent medical attention, we can arrange to have them taken into Moab, less than 30 miles away. We encourage all groups to have their own basic first aid supplies in camp including Band-Aids, pain relief tablets, and after sun care for sun burns and a supply of feminine hygiene products. We don't require your group to bring a specific medical person.

Q. WHAT IS THE BEST SUNSCREEN TO BRING?

A. The best sun protection is a long sleeve shirt and long pants. From our experience the best sunscreen is the lotion type that is SPF 30-50. Anything more than 50 tends to have too many chemicals. We highly discourage the use of spray sunscreens as they tend to not be applied correctly and give a false sense of security in sun protection. The fumes are also obnoxious when sprayed in the close quarters on the rafts. In the past, some groups have complained about getting a rash thinking that it might be something in the water, but when dermatologists are consulted it is the use of sunscreen that is contaminated, outdated, or too high SPF that is generally the cause. **Please avoid bringing spray sunscreen and sunscreen over 50 SPF.**

Q. ARE THERE TOILET FACILITIES AVAILABLE?

A. There are vault toilets at the launch site and in the public campgrounds we use. During the day while on the river, there are limited toilet facilities for solid human waste. Each boat will have a solid waste disposal bag for emergencies if the need arises and the raft is not able to get to the bathroom quick enough. The rule in the desert is to pee in the river during swimming. The longest time without access to a restroom facility is about 3 hours each day. Our guides (both male and female) are sensitive to the unique challenges that may be encountered by women while traveling in a wilderness area. Please don't hesitate to ask them if there are questions concerning these issues. They are willing to help and are willing to make an emergency stop if needed. It is helpful for women to wear 2 piece swimsuits and/or have a skirt or wrap around sarong to wear while on the trip for more privacy. If needed, you do not have to swim on this trip. You still may get splashed from either water fights or the rapids. Ziploc bags are handy for storage and disposal of feminine hygiene products to use while on the river. Guide first aid kits on each raft contain a limited supply for emergencies. Please bring any other items as you deem necessary for the comfort of your group. Hand washing stations are set up in camp near the kitchen areas to wash hands after using the restrooms in camp. Hand sanitizer is available at lunch.

Q. CAN WE TAKE A SHOWER?

A. The only clean water we bring is for drinking and cooking. Bathing in the river is acceptable, but it is best to use biodegradable soap. When the water is cold, baby wipes work well for getting the major dust and river water off.

Q. WHAT KIND OF WEATHER CAN WE EXPECT?

A. The Moab area has warm weather from May to September. July and August are warmer than June. The temperatures in the summer generally range from 80-110 degrees during the day with 70-85 degrees at night. Rain is not common during June and early July, but afternoon storms can be common in late July and August. The weather forecast can give you an idea of what to expect. If the forecast indicates rain come prepared because when it rains, it usually rains hard. Wind can also be a problem so be sure that all tents and items left in camp are secure before leaving camp for the day.

Q. WHAT KIND OF GEAR SHOULD WE BRING?

A. A packing list has been provided with a list of appropriate clothing and camping gear. There are changing rooms at our warehouse available to change clothes before and after your trip. **Showers are not available for guest use.** Clothes are best packed into one bag and sleeping gear into another. It is difficult to load and unload the trailer when the bags are bulky or tied together. Don't bring anything that can't get dirty. A clothesline is handy to have to string between trees for drying when off the river, but most of the time clothes dry quickly while wearing them. Quick drying shorts are the best to have as jeans don't dry very quickly. Cotton t-shirts in the summer months are fine. **We require that shorts or swim trunks be worn over swimsuits to avoid chafing and other discomfort from the rough surface of the boats or to keep from sliding off boats with smooth surfaces.** Closed toe shoes or sandals with an ankle strap work better while on the boats during the day as they stay on your feet and offer more protection for your toes, but there is no need to buy expensive water shoes and any sandals, flips, or slippers will do.

Q. CAN WE TAKE ANYTHING WITH US ON THE RAFTS?

A. It is not advisable to take anything on the raft with you except a hat, water bottle, and sunscreen. Anything taken with you will get wet. Towels, extra clothes, and food are not necessary to bring. There will be a rowboat along, which carries the lunch, first aid kits, etc. Some groups find it helpful to have one dry bag on each boat to collect the items needed for the day (t-shirts, sunscreen, cameras). There will be a bag on each boat to keep the water bottles secured.

Q. IS WATER FIGHTING ALLOWED?

A. Yes, we do allow a controlled amount of water fighting on our trips between rafts. It is better that you keep the engagement between members of your own group, but occasional interaction with other boats from our company is allowable. We do not engage other companies even if someone else squirts the first shot. In the past, most of the injuries and lost personal items on a river trip have come from aggressive water fighting so we have implemented a few rules to keep the engagement friendly: The use of squirt guns, squirt tubes, and buckets are an acceptable form of engagement. Empty ice cream buckets and milk jugs with the end cut off make great water fighting tools that you can bring. There is no jumping from boat to boat to throw people in or pull people out of the rafts. The paddles cannot be used to splash as they have the tendency to hit shins and heads and leave nasty wounds. If it feels like it is getting out of control the guides will end the interactions.

Q. WHAT KIND OF RAFTS WILL WE BE ON?

A. You will be paddling 16-18' paddle rafts. They hold 10-14 people plus the guide. If there is a rowing frame on the raft, this raft will hold 6-8 people along with the guide. Smaller two-person inflatable kayaks are also available. We typically send 1 or 2 kayaks for every 10-16 people in your group (depending on availability and water level). Each group is assigned their own set of rafts and inflatable kayaks prior to the departure. The paddle rafts require participants in the boat to paddle. For liability and logistical reasons, we do not allow guests to bring their own boats or watercraft.

Q. DO WE HAVE TO WEAR LIFEJACKETS ALL THE TIME, AND CAN WE BRING OUR OWN?

A. Lifejackets are an absolute necessity any time you are near the water, including time in camp when you want to play in the river. We are required to use Coast Guard approved, Type V, whitewater jackets, **so please don't bring your own.** The lifejackets we provide fit up to a 55 inch chest size.

Q. IS DRINKING WATER PROVIDED?

A. We bring ample amounts of water for your group to drink. If the group starts running low, we bring out more. Drinking water is provided on the boats during the day and in camp at night in water coolers. Every participant should bring a 16-32 oz water bottle to keep with them for drinking on the boats and in camp. There is water on the main support raft that can be accessed at any time to refill water bottles. During warmer months, we try to get water coolers on each raft. We ask that the water out of the water jugs only be used for drinking and not for bathing, hand washing, or squirting each other out of the water bottles. Lemonade is also available in camp. Water enhancers are a nice way to give your water bottles a little extra flavor when you are on the river during the day. The best way to prevent dehydration is to start your group drinking at least ½ gallon of water per person per day a week before you come on the river. Most dehydration occurs because someone in the group shows up already dehydrated and can't catch up drinking on the river. While we try to provide ice to keep the water cold, during the warm summer months, and due to the limited supply of ice in our small town, we can only guarantee wet water, and not that it will be ice cold all the time.

Q. WHAT MEALS ARE PROVIDED AND WHAT KIND OF FOOD WILL WE HAVE?

A. Meals start with lunch the first day and end with lunch the last day at our warehouse. Lunch each day is a make it yourself sandwich buffet, with lunch meats, cheese, tomatoes, lettuce, onions, pickles, breads, etc. We also serve fruits and cookies. Breakfast might be pancakes, sausage, melon, or French toast. Dinner may include spaghetti, green salad, or hamburgers, vegetables and dessert. A more detailed menu is available in the trip documents. Eating utensils and plates are provided for breakfast and dinner. Since sandwiches and fruit are served for lunch no cutlery or plates are provided. Hand sanitizer is available at all meals. Souvenir drinking cups are provided for each person in camp.

Q. CAN WE BRING OUR OWN SNACKS?

A. Snacks are not an absolute necessity on this trip as we supply ample amounts of food. If you would like to bring a few for your group they are not necessary at all the first day, but maybe a nice thing to have on day two and in camp mainly as a way to connect with the kids. Plan on bringing 1-2 items per person in a good quality watertight bag. Make sure to not bring anything that can melt and a garbage bag to put wrappers in. Please ask guides before giving snacks out on the river.

Q. DO THE KIDS OR LEADERS PREPARE THE MEALS OR CLEAN UP?

A. The guides set up the kitchen and do all the cooking and clean up. You can all relax and enjoy the scenery and time with your group. Each group will be responsible for helping to unload and load the gear on the trailer and set up their own personal camping areas. Most groups set up camp before dinner and take it down right before breakfast. When your group leaves the camping area, we ask that a thorough clean-up of the camp be done for all trash.

Q. WHAT IF WE HAVE FOOD ALLERGIES?

A. Please let us know about any food allergies in advance by email and be sure to remind the guides at the start of each meal prep. If we know about food allergies in advance, we can make minor accommodations in food preparation for the safety of those with allergies. If your food allergy is severe, we suggest you bring a few of your favorite food items and we can help you transport them on the river for you to use when necessary. The only peanut products we use are peanut butter for sandwiches at lunch. Those with a peanut allergy go through the lunch line first. For those with severe gluten allergies we suggest bringing your own favorite brand of gluten free bread, noodles for pasta night, and supplemental breakfast items. You are welcome to bring your own food cooler with items in it or we can transfer them to our coolers. A basic menu is included with the trip documents.

Q. ARE THERE CREEPY CRAWLYS AND CRITTERS ON THE RIVER?

A. At some campsites and water levels the mosquitos and gnats can be kind of pesky. Bringing a bottle of bug spray is a good idea. There are ants, mice, squirrels, and other rodents that will get into tents or bags if left open with food in them. Be sure that all trash and food items are put away before leaving camp. If the bugs aren't bad, it is fine to sleep outside of the tents at night.

Q. WHERE WILL OUR GROUP BE CAMPING AND DO WE MOVE CAMPS EACH NIGHT?

A. This trip camps in a different BLM administered campsite each night along Highway 128. Some we reserve in advance, others are first come first serve for the general public and we do our best to get our groups the best campsites we can. These are public campgrounds, and we are asked to abide by the campground rules of 10 pm quiet hours and respect the privacy of the other campers in the area. Leaders are responsible for keeping their groups quiet after 10 pm. The campgrounds have picnic tables, pit toilets, and some have shade shelters. There is no electricity or running water at the campsites. Please do not bring decorations for the campsite. The beauty of the surrounding red rock cliffs is all that your eyes need to see.

Q. CAN WE BRING MOTORHOMES AND CAMP TRAILERS TO SLEEP IN?

A. The logistics on this trip make it not possible to bring camp trailers or motorhomes to stay in while camping along the river. We do have space available in our warehouse yard or nearby parking area to keep a motorhome at our warehouse while you are on the trip if you are traveling in it to our area. It is also not advisable to bring them because generators cannot be run after 8 pm or before 7 am and it can be very hot to sleep in an enclosed vehicle without air conditioning.

Q. CAN WE HAVE A FIRE IN CAMP?

A. Fires are not allowed on our trips for several reasons. We are often placed on a fire ban during June and July so please do not plan on having any type of fire in camp. Most nights are also too warm for a fire to be comfortable, and it does not get dark until almost 10 pm. **If your group would like a fire type atmosphere, we suggest using yellow or red glow sticks/lanterns as any kind of white light (lanterns) attracts insects at night.** If your group feels like smores need to be part of your camping experience, we suggest s'more flavored granola bars or s'more flavored brownies brought with you.

Q. CAN WE BRING HAMMOCKS TO SLEEP IN?

A. **Hammocks are not allowed.** Some of the campsites lack adequate trees to support hammocks and the pavilions are reserved for activities and meals. It would be disappointing to count on using a hammock and not be able to. Please leave them at home.

Q. DO WORLD WIDE GUIDES PREPARE ANY EVENING ENTERTAINMENT OR A FIRESIDE PRESENTATION FOR THE TRIP?

A. The guides can be prepared with an activity in evening if that is what your group would like. This could be playing games, a guide Q & A, a talent show, or they can help you with any activity of your choice. There are places in each campground for your group to have limited privacy for a fireside or more spiritual activity that you direct. There is time late in the evening to gather your group for a quiet activity or closing devotional. The guides can assist you in any of your group activities if you ask them when you check in. A questionnaire link will be sent to your group as we get closer with more information. There is ample space in the camping areas for your group to bring equipment like frisbees, footballs, Cornhole. Spikeball, or other yard games.

Q. IS THERE DOWNTIME IN CAMP?

A. There is always some downtime in camp. How much downtime all depends on the water level and the weather for the day. Typically, early in the season, end of May to end of June, the water level is up which may mean you arrive in camp earlier than usual where there will be more downtime before dinner. It is a good idea for leaders to have ideas for activities for their group so that no matter how much downtime you may have you can have something to do, but you don't need to over plan.

Q. IS THERE CELL PHONE SERVICE ON THE RIVER TRIP?

A. The simple answer is no there is not. Cell phone service is spotty at best. There are some places along the river that texts can be sent out using Verizon, but service for phone calls cannot be counted on. This is a great opportunity to unplug from the technology that often distracts from enjoying each other and the beautiful scenery around.

Q. WILL OUR GROUP BE TRAVELING WITH ANY OTHER GROUP?

A. There is a good possibility that your group will launch with another group and be on the river with them during the day. We do our best to get each group their own set of rafts. The campgrounds are very large and we separate the groups as best we can. You might share the same kitchen area and lunch raft as the groups generally that camp together also float on the river together.

Q. CAN WE ADD MEMBERS TO OUR GROUP?

A. You can add members to your group before the trip goes out, providing they are paid in full before the trip departs. Please let us know as far in advance as possible so we can properly plan for them. We try to be flexible but emailing or texting us at least 4 hours before your meeting time is very helpful in our scheduling.

Q. IF WE HAVE MEMBERS OF OUR GROUP WHO CANNOT GO ON THE TRIP AT THE LAST-MINUTE WILL THEIR MONEY BE REFUNDED?

A. We suggest that you find a replacement for the person who has had to drop out. We know that individual numbers are hard to pin down until the last minute. **While we try to be as flexible as we can with individual cancellations and additions, there will be no refunds issued the day of departure without notice (email or text) of cancellation 24hrs before day of departure. If your numbers are off by just 1 or 2 you can email or text 4 hours before the meeting time and we can still offer a partial refund. No refunds are given for cancellations after arriving at our warehouse and those funds cannot be used toward a guide gratuity.**

Q. WE HAVE MEMBERS OF OUR GROUP WHO NEED TO LEAVE EARLY OR JOIN AFTER THE LAUNCH TIME?

A. The campsites we use are road accessible so meeting up with the group is not a problem, but it requires shuttling if someone isn't dropping them off or picking them up. Each circumstance is different. Please contact our office for specific information. There are no discounts given for late arrivals or early departures and a fee will be charged if someone has to be caught up to a trip after it has launched.

Q. WILL WE NEED MONEY ONCE WE GET TO MOAB?

A. In our company store we have sunglasses, sunscreen, T-shirts, bracelets, stickers, squirt guns, and J-Slip sandals. At the end of the trip, you will be transported from the river back to your cars at the warehouse where lunch will be served. At this time there will be an opportunity to buy souvenir t-shirts to remember your trip. T-shirts start at \$15.

Q. WHAT ABOUT TIPPING?

A. You should never feel that a gratuity is automatically expected from you, but it is a great way to acknowledge excellent service. Our guides work hard to make each expedition a memorable and rewarding experience. Gratuities can be put on your invoice if needed for reimbursement. While gratuities can be paid in our office using a check, credit card, or refund money that is due back to you for cancellations made prior to your launch date, it can also be given directly to the trip leader or your guide in cash or Venmo. May we suggest \$5-\$20 per person in your group. Cancellations made on the day of your departure cannot be put toward guide gratuities.

Q. ARE THE GUIDES CERTIFIED?

A. All guides have the experience and other qualifications as required by the state of Utah for Commercial Boating. World Wide River Expeditions guides participate in an extensive pre-season training that includes Advanced first aid and CPR, whitewater rescue techniques, general boat maneuvering, and Youth Protection training. The highest level of standards is expected of all guides in language, attitude and dress and appearance.

Q. WHAT IS YOUR POLICY ON COVID AND OTHER COMMUNICABLE ILLNESSES?

A. We are grateful the COVID situation is minimizing, but we can't let our guard down regarding any viral illnesses that sometimes can happen when groups of people get together. First and foremost, if a participant is sick, don't bring them. Our cancellation policy is pretty flexible, and we would rather refund for that person than have any sickness get passed around. Second, good hand hygiene is one of the best ways to prevent passing any illness. Hand washing and sanitizer will be encouraged during every meal. We will provide hand sanitizer, but it is also a good idea to have some for your personal camp areas. Third, masks will not be required on the river, but will be encouraged in our vehicle transportation and during times in camp where social distancing is not possible. This recommendation may change as the federal government relaxes their mask mandate on federal lands. Most of our employees have been vaccinated, but we are not requiring it.
